

IMPACT MONITORING OF MINERAL RESOURCES EXPLOITATION

Save the date for the ImpactMin Symposium

27-28 NOVEMBER | KULTURENS HUS, LULEÅ | SWEDEN

Dear Sir/Madam,

After nearly three years of intense research work, the ImpactMin Project is closing its end. Many impressive and comprehensive results have been made during the course of the Project regarding the influence of mining activities on social and ecological structures.

The programme of the Symposium will provide you with informative presentations, fascinating insights and pioneering findings.

Please save this date in your planning schedule for November 2012. For further information about the numerous and current topics covered by the event please refer to the Project website at www.impactmin.eu.

The event is open to all interested parties, however, registration is required. Please register and/or submit your abstract on the web page of the event at the ImpactMin project's homepage.

Detailed information about the programme will be published in late October.

Yours faithfully,

Mr. Peter Gyuris

KEYNOTE SPEAKERS**TOPIC****INSTITUTE**

Dr. Győző Jordan

Risk-based inventory of mining waste. EU legislation, assessment, methods and implementation

EC – Mine Waste Inventory WG

Dr. Anders Lundkvist

Environmental Monitoring and Responsible Mining

LKAB, Sweden
